# Athe farm in rensselaer, in MARCH 15, 2025

# Welcome to Waukaru!

Thank you for reviewing *The Gathering 2025* offering. At Waukaru, we strive to be not only a genetic provider but one passionate about your success in the beef industry. Every decision at Waukaru aims to create better and more profitable outcomes for our customers. We are committed to being your source for solutions and answers.

The past 18-24 months in the beef industry have been thrilling for cow-calf producers, who now have significant leverage. This cycle will be longer and slower to peak than previous ones. Consumer demand is at an all-time high. Investing in genetic material now will help operations adapt to future changes.

The US Beef Industry is finalizing it's liquidation phase, resulting in fewer breeding females. This delays market highs by 18-24 months. Remember, it takes 60 months for a heifer calf born this spring to produce a finished steer. Investing in genetics now will yield long-term profits. Additionally, selling a mature bull now brings you closer to affording new, more profitable genetics.

The daughters of the bulls available on March 15, 2025, will be most productive at 5-7 years old, aligning with a softer calf market. Randy Blach of CattleFax notes that demand increases since 1998 reflect high-quality cattle grading low choice or higher. Investing in genetically superior cattle that meet market demands and produce profit-generating daughters is advised.

The bulls in this group exhibit superior performance even compared to previous ones. Efforts have been made to ensure that mature weight remains controlled and reasonable. This process required patience and unwavering commitment, as we did not compromise growth during the adjustment period. This group also includes a higher proportion of highmarbling genetics. Selections were meticulously made, and new genetics were introduced without sacrificing muscle

for increased intramuscular fat content. Focus on structural soundness, maternal instincts and fleshing ability remains a priority at Waukaru. As always, our cows are expected to perform consistently every day.

We are offering 40 ready-to-breed fancy replacement heifers, perfect for expanding the nation's cowherd and driving profit. Join us at Waukaru on March 15, 2025, to inspect the cattle. We will update our website with ultrasound info, videos, and pictures as they become available. SmartAuctions provides online bidding, or you can call us directly if needed. Contact us anytime with questions about the cattle; we always welcome your visit.

TEXT "WAUKARU" TO 55444 TO RECEIVE OUR E-UPDATES.

## TERMS & CONDITIONS

**Billed Accounts:** All billed accounts are due within 10 days following the date of the sale. At 10 days, a 2% service charge will be added to the unpaid balance and an additional 2% will be added every 30 days thereafter unless previous arrangements have been made with Waukaru Farms Inc.

**Insurance**: Insurance will be available for your purchase at the sale through Harding & Harding. Let the clerks know of your needs at the settlement desk.

**Genetic Defects:** All bulls selling are free of any known genetic defects.

**Health:** Each bull will be represented by a valid health certificate. Every animal 24 months and older at Waukaru tests negative for Johnes Disease. All bulls selling are up to date on vaccinations and deworming. Waukaru uses a modified live vaccine. Waukaru will test for trichomoniasis if required by state health regulations.

**Breeding Status:** All bulls have passed a Breeding Soundness Exam performed by the StockVets.

Semen Rights: All bulls sell in their entirety. Waukaru does retain in-herd semen use on every bull. If Waukaru decides to use any of the bulls, it will collect semen at the Sellers cost at a time that is convenient to the owner and with the best safety and care for the bull. All revenues generated by selling semen would be of the new owners, not Waukaru.

**Liability:** Each bull will be at the buyer's risk as soon as sold, but will be cared for by Waukaru for a reasonable amount of time. Neither Waukaru nor any of its employees can be responsible for any accidents, but will make every effort possible to provide for the safety of those attending.

**Bidding Procedure:** This is a "silent chant" online auction. Bidding will open on all bulls at 8:00 a.m. on Thursday, March 13, 2025. Increment bids of \$250 will be accepted on the bulls, \$100 increments on the females. Bidding can be executed through www.smartauctions.auction or by calling Toby Jordan at 219-819-4603 or Barry Jordan at 219-819-0430. Bidding will remain open on all bulls throughout the duration of the sale.

**Trucking:** Waukaru will make every effort possible to insure safe, convenient, and affordable delivery. Waukaru will share in costs so not to exceed \$350 per bull anywhere in USA and ports to Canada and Mayico.

1950s.

Waukaru Payday 4002 is a sure bet for heifers. His pedigree lines up multiple calving ease sires that are proven in numerous herds across the globe. Payday 4008 is sound in his design, and from the mold that one needs to keep replacements. Payday 4008 is bold in his chest floor, big ribbed and lands in the top 5% for CED and 3% for \$CPI, the breeds new maternal index.

Admiral 4043 is sired by the high selling bull from 2021 and is now in Ontario, Canada, as the senior herdsire for Don Jack. Waukaru Admiral 4043 was the anchor Dull for our Champion Pen of 3 Bulls at the National Western in Denver, Colorado. Admiral 4043 is bold and dense in his build, with tremendous width to his chest floor, impressive outward turn to his ribcage, and explosive muscle. When set in motion, this ruggedly constructed sire reaches easily out of every joint. His dam is one we rely heavily on; easy fleshing and broody, she has a combined weaning ratio of 107 on three progeny.

These three ET mates are sons of Waukaru Red Nan 7050 and the carcass and growth champion, Eighteen Seventy Two. They are maternal brothers to the high selling bull from The Gathering 2020, Waukaru Rawhide 9001, that is now a herd sire for Marda Farms and Kory Cummings, both of Wisconsin. The sire, "1872," of this trio is one of very few animals of any breed to rank in the top 1% of a population for both REA and MB. These three bulls are big topped, growthy and designed with today's beef industry in mind, i.e., to generate extra dollars with yield and quality grade.

# FANCY COMMERCIAL HEIFERS

We are excited about the four runs of commercial heifers we're adding to this line-up. These heifers will sell in the same format as the bulls on

SmartAuctions, and are ready to breed this spring. If the new owner chooses, they can be left at Waukaru to be synchronized and artificially inseminated. For \$175 per month, Waukaru will cover all feed, drug and labor costs, and provide semen on any heifer-safe sires in the Waukaru bull battery.

A powerful set of brood cow prospects are from Sproul Livestock in northwest Oklahoma at Isabella. These cattle were born and developed on land that has been in the family since the Land Run of 1893. Sproul Livestock is a commercial cow-calf operation focused on developing high quality replacement females and market-topping steer calves. The cow herd is comprised of moderate sized, Red Angus and Red Angus x Shorthorn females who offer plenty of capacity and depth of body. The red sandhills of Major County require cattle to be

sound, while the limited rainfall and feed resources demand efficiency. The Waukaru bull genetics utilized have proven to complement Sprouls' program by maximizing both the maternal and growth characteristics necessary for a profitable operation. This group of heifers are sired by sons of Thermal Energy and Prime Time Teddy.

Again this year, a fancy, growthy set females from Randy Bulington of Monon, IN. Randy started buying Waukaru bulls over 20 years ago, and he has converted his Angus and Hereford-based cowherd to Shorthorn by keeping back the best Shorthorn-sired daughters. Currently, Bulington is using a Prime Time Teddy grandson and it has really worked. The Bulington cowherd summers on mixed fescue pasture on droughty sand and a bit of Reed Canary Grass in some wet areas. Often the cattle will be supplemented with plant by-products to get to the available cornstalk and rye winter grazing ground.

For videos and more information on the heifers, visit www.waukaru.net.
